

CASE STUDY

Two weeks of genuine engagement before the ask lifted accept rates from ~30% to 50%+ and roughly doubled replies.

THE BUSINESS

A business running the cold connection engine and wanting **every number in the funnel to move**, on the same 550-prospect list.

The situation

A request from an unknown name gets a guess. A request from someone who left two smart comments on your posts last week gets a positive opinion, formed before you asked for anything.

And the comments are public, seen by the prospect's audience, which overlaps heavily with your ICP.

What they did

- 1

Monitored the ICP list's posts and surfaced each new post to a queue.
- 2

Sent one thoughtful comment per prospect, drafted for review, in the founder's voice, never generic noise.
- 3

Gave it 1 to 2 weeks of light genuine presence, two or three touches.
- 4

Then connected, from a now-familiar name, with an opener that continued the comment thread.

The result, same list

Accept rate ~30% cold → 50%+ warm, replies roughly 2×

The same 550 prospects, roughly double the conversations, plus free public reach.

50%+
accept rate, up from ~30% cold

~2×
reply rate on the opener

free
marketing, comments seen by the ICP

same list
no extra prospects needed

	BEFORE	AFTER
Accept rate	~30%	50%+
Reply rate	baseline	~2×
Opener	cold	continuation
Comments	wasted	public reach

Want the engagement layer mapped?

Reply "WARM" and I will map it for your ICP. Free.
