

CASE STUDY

100 personalised emails a day, zero sent by a human, at ₹1,250 a meeting instead of ₹5,500.

THE BUSINESS

A business relying on an **SDR at ₹60,000 a month** plus tools, getting 10 to 12 meetings, with pipeline that vanished whenever the SDR resigned.

The situation

Outbound only works on verified lists, personalised first touches, timed follow-ups, real reply triage and tracking from send to meeting. A blast tool is none of that.

Bad lists kill outbound before the copy ever gets a chance.

What they did

- 1 Built and enriched ICP lists, every contact verified before entering the queue.
- 2 Sent a personalised first touch per contact, under 120 words, in the founder's voice.
- 3 Ran 4 sequenced follow-ups over 3 weeks, each adding value, all stopping instantly on a reply.
- 4 Auto-triaged every inbound: interested to the founder's phone, objection queued, unsubscribe honoured, bounce cleaned.

The result, cost per meeting

₹5,500 → ₹1,250 per qualified meeting

4.5× cheaper per meeting, and a pipeline that survives the quarter the SDR resigns.

100 / day

personalised sends, no human

~₹15K

run cost a month vs ₹60K SDR

~12

meetings a month, no sick days

4.5×

cheaper per meeting

	BEFORE	AFTER
Cost / meeting	₹5,500	₹1,250
Run cost	₹60K/mo	~₹15K/mo
Sends / day	human-capped	100
Continuity	fragile	durable
